

The DotGov Program

Putting the US Government on the Internet

Jessica Salmoiraghi, Associate Administrator,
Office of Government-wide Policy
U.S. General Services Administration

What is .GOV?

The DotGov Program **operates the .GOV top-level domain (TLD)** and makes it available to **US-based government organizations**, from Federal agencies to local municipalities.

History of .GOV

GSA begins federal
.GOV domain
registrations

HTTPS Preloading, MFA &
WHOIS added as .GOV
security features

What We Do

Areas of Authority

Infrastructure

There are approximately 6,000 .GOV domains

Policy

DotGov is the issuing authority for .GOV domain names

Management

.GOV Registrar operations with 24/7 help desk support

.GOV Registrar Help Desk

The .GOV approach

24/7 support

**Password
resets**

**Domain POC
changes**

**DNS/DNSSEC
updates**

**2-step
authentication**

**Create POC
accounts**

**Domain policy
FAQs**

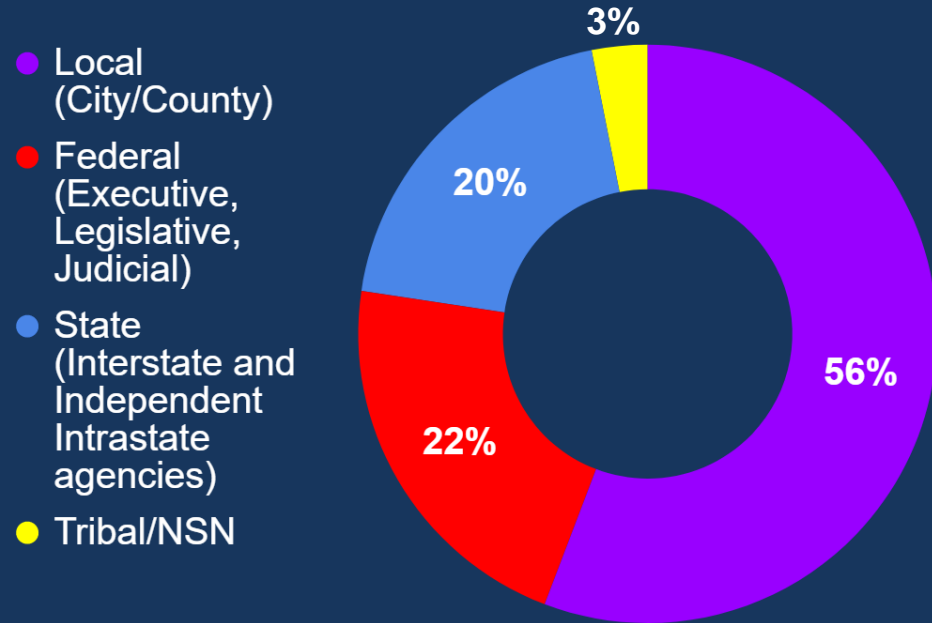

**Portal
navigation**

**Customer
outreach**

State government organizations **make up 20%** of all .GOV domains

.GOV customers by domain type

from April 2019

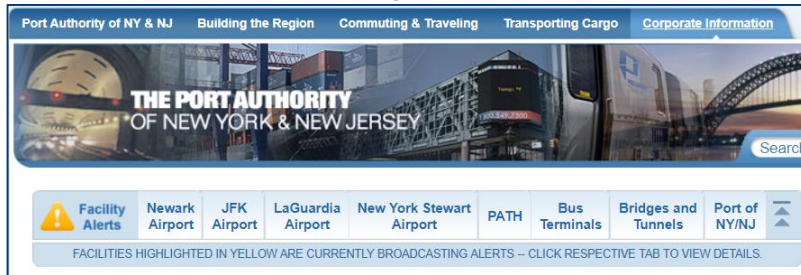

Did You Know?

New State Domain Types in 2019

Interstate

Port Authority of NY and NJ

The screenshot shows the top navigation bar of the Port Authority of NY and NJ website with tabs for "Port Authority of NY & NJ", "Building the Region", "Commuting & Traveling", "Transporting Cargo", and "Corporate Information". Below the navigation is a banner image with the text "THE PORT AUTHORITY OF NEW YORK & NEW JERSEY" and a search box. A row of facility alert tabs is visible, including "Facility Alerts", "Newark Airport", "JFK Airport", "LaGuardia Airport", "New York Stewart Airport", "PATH", "Bus Terminals", "Bridges and Tunnels", and "Port of NY/NJ". A note at the bottom of the screenshot states: "FACILITIES HIGHLIGHTED IN YELLOW ARE CURRENTLY BROADCASTING ALERTS -- CLICK RESPECTIVE TAB TO VIEW DETAILS."

Multistate Tax Commission

The screenshot shows the Multistate Tax Commission website. On the left is the logo for the Multistate Tax Commission (MTC). To the right of the logo is the mission statement: "An intergovernmental state tax agency whose mission is to achieve fairness by promoting compliance and consistent tax policy and practice, and to preserve the sovereignty of state and local governments over their tax systems." There is a search box on the right side of the page. At the bottom, there is a navigation bar with links for "THE COMMISSION", "UNIFORMITY", "NEXUS", "AUDIT", "EVENTS & TRAINING", and "RESOURCES".

Independent Intrastate

Tennessee Valley Authority

Creating a Secure .GOV Domain

DotGov Best Practices

- Add a security contact
- Develop a vulnerability disclosure policy
- Preload your domain with HTTPS
- Sign up for DHS Cyber Hygiene
- Join MS-ISAC

For a complete overview of security best practices, visit us at:
<https://home.dotgov.gov/management/security-best-practices/>

Choosing a TLD

US-based Governments Have Options

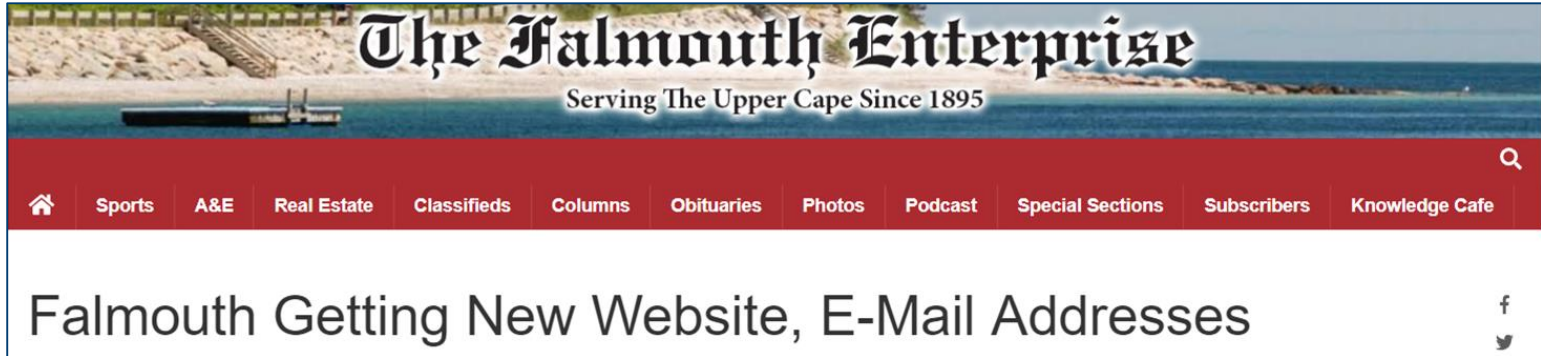

The .GOV TLD

.GOV is sponsored, therefore exclusive

TLD Options	Sponsored?	Exclusive?
.gov		
.com		
.org		
.net		
.us		

Case Study 1

City of Falmouth switches to .GOV to increase security & legitimacy

A City IT director reported a noticeable rise in services that are masquerading as state or municipal services

The public is aware of .gov name spaces and relating that to legitimate county, state or municipal services.

Case Study 1 (Continued)

HTTPS Preloading

“McAfee found similarly bad percentages when it also inspected the county election websites for the use of **HTTPS, a core technology that prevents third-party observers from snooping or modifying traffic** between a user and the election website.”

Case Study 2

Suspicious domain requests rejected in .GOV

An individual had been contacting us attempting to register questionable interstate Domains.

For example, he submitted a request in 2016, which lists Barack Obama as the billing POC.

Hello GSA,

We wanted to bring to your attention regarding an individual who has been contacting us this morning, attempting to register questionable interstate domains. We have determined that he is not eligible for a .gov domain under interstate, or any other .gov entity that we allow. We have already responded back to them that we are rejecting the request, but we wanted to notify you of these peculiar requests. This individual has repeatedly attempted to register .gov domains which are ineligible under questionable entities. For example, he submitted [usdibs.gov](#) back in 2016 (please see attachment) which lists Barack Obama as the Billing POC.

Thank you for your attention to this matter.

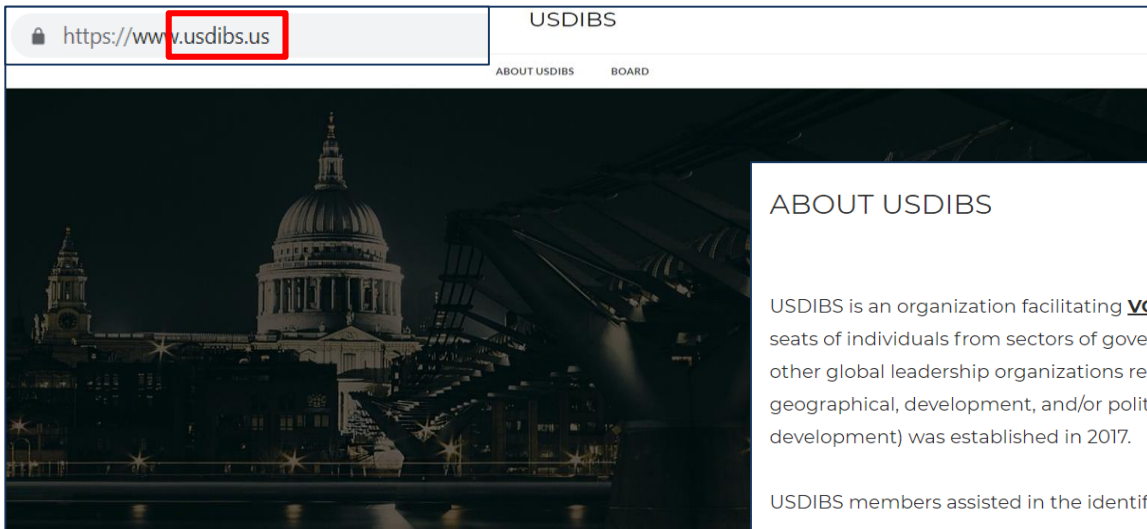

Please let us know if you have any additional questions and or concerns.

Kind Regards,

Phil

Example of a suspicious domain - approved in .US

ABOUT USDIBS

USDIBS is an organization facilitating VOWAS and other Qualitative Phasing economic services with board member seats of individuals from sectors of government, military, public corporation, small business, and non-profit. Although other global leadership organizations recognize a smaller number of total world entities, for strategic, economic, geographical, development, and/or political reasons a higher allotment of world entities (with some in stealth development) was established in 2017.

USDIBS members assisted in the identification and creation of the:

- the Proclamations for Qualitative Phasing
- the external factors responsible for long standing institutional damage
- the fourteen (14) Universal Standard Offerings (USO's)
- Overall plan for the new economy
- the \$126 trillion dollar budget for Qualitative Phasing Round one (1)

Case Study 3

.GOV Preferred by local government officials

According to local officials, county governmental departments and offices **operate more effectively** on a .gov domain. Important public services can be disrupted because of the inherent **lack of authority that comes with all domains not named .gov.**

Why .GOV?

Main Takeaways

Secure

HTTPS
preloading
ensures use of
secure servers

Trusted

.gov is *exclusive*
to U.S.
government
organizations

Authoritative

Oversight for
the issuance of
.gov domain
names
